Our Story

„InterWay was founded in 1997. Information technologies were more than a pure business interest to us. We believed IT to be the main drive of progress in majority of everyday activities in all fields of work and life. We have put all our efforts to form this environment in our company - InterWay.“, said co-founder Richard Weber.

You help us grow. At the beginning, there were only a few of us; in the course of time, we have developed to a company consisting of two strong divisions with 90 employees. The IT division develops individual and technologically demanding solutions designed in accordance with the needs of our customers. Web-Solutions division has become one of the key supplier of portal and intranet solutions. These solutions are regularly awarded by “Zlatý erb” (Golden Crest) - a national IT award.

We operate in Slovakia and Czech Republic almost for two decades. During that period we have become familiar with the needs of customers and we have transformed these needs into economic growth. Since the very beginning, our company has been following a customer-oriented policy - we exist to serve our customers.

„At the very beginning, there was a vision. The vision of a company that would be bold and innovative and dynamic a company that would not only reflect trends in IT but would set them for others. We are happy to have people on board who create individual solutions for our customers the solutions that have been successfully implemented and used by our customers for years and that they can make profit and benefit from. Our company has been, is and always be driven by the maxim “Customers first.”

Analysis

Team of our analysts deals with your requirements and needs on a daily basis. In order to create a complex solution, they analyse a great number of data and processes; they simulate usability cases and they design optimal interfaces for users and their systems.

Cloud computing

A few years ago, we were charmed by a trend, which was then only little known in Slovakia and Czech Republic - Cloud computing. However, our developers were so fascinated by that new thing, they could hardly sleep due to the excitement, and so they zestfully embarked on it. Today, their focus is on cost-reduction, resources use optimization, unification of environment for development, testing and operation of technologies using global cloud environments, especially Amazon, Microsoft and Oracle.

Hardware

In today's market, we hold a non-negligible position in supply of hardware made by global producers. Thanks to many years of experience, we are able to provide our customers with not only suitable computing technology but also with technically demanding solutions.

Integration

Our focus is on the integration of applications using Oracle Middleware and WSO2; we develop customized application in JAVA environment using the programming and portal frameworks. We provide and deliver solutions and technologies for server infrastructure and virtualization.

Consultancy

We help our customers to find solutions and we offer alternatives to facilitate the work of their employees; be it a complex information system, integration platform, BMP, intranet portal or its extended mobile application.

Our consultancy services are based on the knowledge of our qualified specialists, numerous certificates, knowledge of the market and following the latest trends in our field. Our clientele ranges from public and local government bodies, telecommunication operators, banks, insurance companies, network industry corporations and industrial producers.

Personal approach of our team

Our sales managers are a well-coordinated team who understands the needs of our clients, and along with our skilled specialists, project managers, developers, analysts and testers helps our clients to successfully achieve their goals.

Project management

Our project team uses project management methodologies and standards of PRINCE2 and SCRUM, whereby each individual project aims to optimize resources, minimize risk and maximize your benefits.

Development

We supply software solutions from small improvements through improving the existing systems to a complex solution design and delivery. In development process, we use continuous integration methodology. Services and processes are based on the best practices and frameworks, such as RUP, ITIL, COBIT, Togaf and Archimate.

Custom products

Content management system WebJET

We provide complex web solutions since 1997. Since then, we have become one of the most significant Slovak IT companies in the field. There is not a better proof of this than hundreds of successfully finished projects and a long-term cooperation with our customers.

Our focus are projects based on our custom content management system WebJET, which can be used to present the pages of various focus, travel agencies, intranet or e-commerce. WebJET is on the market since 2001, and due to the growing demands of our customers as well as their intensive feedback, we have developed this universal tool.

- we think of every customer“

Satisfied customer

„Rebranding was a great challenge for us; it was about a lot of work in a very short time. With the help of InterWay, we managed not only to comply with deadlines, but we have also improved our website.“

Lukáš Řeřicha, Manager of Direct Channel Development, NN insurance and retirement services company

Intranet portal

Intranet portal is an application solution suitable for immediate deployment for inter-corporate use. Intranet offers a numerous operational modules to individual employees. The modules are designed for joint cooperation as well as for individually customizable working environment. The solution is based on the latest application and presentation technologies, such as AJAX and J2E. You do not need to install additional software on your computers to operate the intranet; it works directly through a web browser.
